Tabla 1. Tasas de empleo por nivel educativo alcanzado y grupo de edad (2014)

	25-34	35-44	45-54	55-64
Educación terciaria	78	85	82	65
Educación medio superior	71	75	76	60
Por debajo de la educación media superior	65	68	64	53

¿Cómo evitar el fracaso educativo?
El fracaso educativo se previene cuando la familia en la que se encuentra una persona se esfuerza por asegurarle un adecuado futuro a sus hijos/as, y proporciona un nivel de apoyo que les permita acceder y permanecer en la escuela.

Structural Array Data

Structural arrays consist of multiple sensors within a building or structure. They provide data to help engineers understand how the structure responds to shaking or vibration.

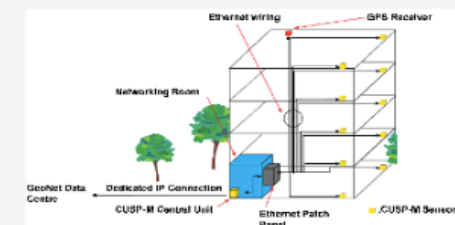

Overview

The structural array programme of the GeoNet project aims to install multiple seismic instruments in about 30 representative buildings (commercial and residential) and bridges throughout New Zealand to gain insights into the earthquake engineering performance of those structures. One of the main objectives of the instrumentation of structures is to mitigate seismic risk by ensuring 'safer' performance of structures. The instruments in the structures record their performance in earthquake-shaking and severe wind events. Knowledge gained from this project will help to ensure that design and construction standards are more appropriately aligned to public expectations.

Apart from considerable gains in knowledge by the engineering community from this project, there are other long-term benefits. These include reduced disruption and downtime following an earthquake, assurances on building safety for owners and tenants, and acknowledgements of the public-good benefit.

The building instrumentation programme considers the distribution of seismic hazard and structures in New Zealand to identify typical and representative samples to instrument and monitor their response. Installations have been completed in Wellington, Levin, Christchurch, Nelson, and Napier and they are now operational. More buildings are planned to be instrumented in Christchurch, Gisborne, Palmerston North, Auckland, Westport, and Greymouth.

Instrumentation and Locations

A typical schematic representation of the components of the seismic instrumentation deployed within a building. The sensors are distributed at various levels of the building and connected through ethernet cables to the CUSP-M central recording unit.

Welcome to OpenDataBC!

OpenDataBC is a collaborative effort by a group of B.C. citizens. Our vision is to provide easier access to information so that citizens may better understand their province.

Open Data allows us to create innovative business solutions, help organizations create new opportunities and answer questions such as how government spends our money, and what data is used to make decisions on our behalf.

[Join OpenDataBC](#)

The Open Data Society is a non-profit, member-driven organization created to promote and support open data initiatives in BC.

de el BANCO DE TALENTOS de PODEMOS

nos)

há 1 ano por [Paco_Bersabe](#)

ne leído en otro hilo: "*necesitamos a un economista solvente que defienda el programa económico de PODEMOS pública..* "... Aplíquese esto a cualquier otro campo.

ece muy acertada la creación de una gran base de personas en base a sus aptitudes. Esto debería ayudar a **or** **ancia colectiva** -desde mi punto de vista, esencia de PODEMOS- para hacerla **ejecutiva**: que cada cual contril que mejor sepa hacer.

do en cuenta el ritmo vertiginoso de los acontecimientos y las importantes citas que se avecinan, compañeros d or:

se está organizando? ¿En qué momento se encuentra y hacia dónde va?

ece de una gran importancia estratégica el situar, cuanto antes, a las mejores piezas sobre el tablero.

s y un saludo.
